

# Changing Forest Cover in the Brazilian Amazon and Cerrado

More than 750,000 km<sup>2</sup> or 18% of the Brazilian Amazon and 825,000 km<sup>2</sup> or 41% of the Cerrado have already been deforested.

MADRID,  
SPAIN

In the Brazilian Amazon, **deforestation increased 29%** between 2015 and 2016 and we lost an area relative to the size of Madrid.

By conservative estimates, in the Cerrado we have lost **more than 6 times the size** of the city of London per year since 2011.
